Internet Society

ISOC LAC
NEWSLETTER | July 2018 Edition

Half of the world's population still does not have access to the Internet. In this context, Andrew Sullivan will assume in September as the new president of the Internet Society, and from his position will seek to reduce the opportunities gap between those who are connected and those who still remain disconnected.

Index

We welcome Andrew Sullivan: new president and CEO since September!

Sullivan was elected as the new CEO of the Internet Society and will assume leadership as of September. The new CEO already has experience in Internet issues, as he has worked to improve the value of the open and global red platform throughout his career. We invite you to read more about him in this link: ow.ly/WdtI30l7M0u

We need more girls in ICT

The Internet Society signed an agreement with the Government of Mexico to promote greater access for girls to ICT, broadening the professional horizon of Mexican women. Internet Society seeks to overcome barriers and close the digital gender gap! Click on the link and find out more: ow.ly/OslS30l7MqE

## Internet to allow sustainable development

ISOC was part of the event "ICT enabling transformation towards sustainable and resilient societies" that was held in New York as part of the High Level Political Forum on Sustainable Development (HLPF).
Shuli Hallak, Executive Director of the New York Chapter, represented us on a panel in which she spoke about Chapterthon 2017 as the winner of the WSIS 2018 Award.
The presentation focused on demonstrating the

potential of the Internet to improve the lives of people by advancing sustainable development priorities in three key areas: gender, education and the future of work, but without losing our core: access to the Internet.

The call for moderators of the online course "Building community wireless networks" has ended.

Internet Society invited the community to participate, to summon those who wish to be moderators of the online course which covers topics essential for effective planning, implementation and operational support of the community's wireless networks.

Lacnic organized the webinar "The routing system is at risk. Let's protect it together!"

On July 16, the webinar was carried out by Andrei Robachevsky, who presented detailed statistics on what is happening in the global routing system and described ways to take advantage of the MANRS safety baseline and demonstrate commitment to the security and the sustainability of the Internet. Talk about Infrastructure and Digital Agenda in Bolivia

On July 2, a talk was held in which specialists developed topics answering questions such as: what are the basic aspects necessary to achieve the technological development of Bolivia? What is the role of architecture to develop our future? What is the digital agenda and what is its importance for the citizen? What should be included or proposed? In this way they pointed to the need for Bolivia to be prepared to face the challenges of hyper-connectivity and industry 4.0.

"A cyber-secure future" webinar

The lecturer Dr. Pablo G. Molina carried out the online workshop organized by the Cybersecurity SIG, which was moderated by Dr. Karina Medinaceli. More details here: ow.ly/scyp30l7KyD
